

JeraSoft Billing 3.7.3

JeraSoft is pleased to announce the release of VCS 3.7.3, which had some additions and improvements. This document will describe the features with most impact on system's functions and also provide information regarding their usage.

General Improvements

1. Invoices templates were improved, i.e. the working logic of packages table variables **{rate}**, **{quantity}**, **{cost}** were enhanced.
2. From now, for assigning DIDs to specific *Account* in *Clients DIDs Management section*, it is needed to previously assign *Package with DIDs* to specific *Account*, not to *Whole Client* in *Clients Packages section*. Otherwise, it will be impossible to assign DIDs at all in *Clients DIDs Management section*.
