- [DID Routing](#)
- [Various small changes and updates](#)

JeraSoft is pleased to announce the release of VCS 3.7.7, which had some additions and improvements. This document will describe the features with most impact on system's functions and also provide information regarding their usage.

General

1. From now, there is a possibility to fully delete a *Tax Profile*. Please note, if a *Tax Profile* is used by a *client*, it can not be fully deleted, only change its status from "Active" into "Archive".
2. If a user will enter wrong login and password several times, the information concerning this will be saved in *Events Log*.
3. *Invoices XLS templates* were improved, i.e. each statistics row contain the *Code Name* (Destination) in the same way as it is represented in PDF format templates.

Interface

1. Interface improvements in *Accounts* section:
 - appearance of new separate column with *Clients icon* that is leading to *Clients list section*;
 - now it is possible to access Rate tables editing window from *Rate table name* in *Accounts List section*.
2. In case when a user has no permissions to update the *Code deck*, there is no any possibility for him/her to use "Deck update mode" field during the process of codes import.

DID Routing

From now on, routing on DID numbers linked with "Ident by Name" accounts is processed totally correct by the system.

Various small changes and updates

1. From now on, statistics reports are not generated of both .csv and .xls formats if the data were not found for creating a report, i.e. there will be no empty reports.
2. Advanced search for *DID Management* *DIDs History* section was improved, i.e. smart search for *Client field* was added.
