

JeraSoft Billing 3.9.6

JeraSoft is pleased to announce the release of new version **VCS 3.9.6**. This article introduces the latest enhancements to VCS billing platform features.

General

1. Our team upgraded the **"Client info"** form of the Client's settings and there are new available options: **"Threshold"** and **"Capacity"**. From now on, you can find it in **the Management → Clients → "Client info" panel → Low Balance Control**.

Now you can set a respective balance limit for the Client in the **"Threshold"** and specify an appropriate channel capacity in the **"Capacity"** that will be in usage. When the client balance is below that it's mentioned in the **"Threshold"** field, the special capacity settings will be applied.

Screenshot: **"Client info" settings**

The screenshot shows the 'Client Info' settings form. The 'Client Info' tab is selected. The form is organized into three columns:

- SYSTEM INFORMATION:** Includes fields for Name, Reseller, Currency (USD), Timezone (default (UTC)), Status (Active), Client's Template, Groups, Tax Profile, and Bill Calls by (disconnect time). There is also a checkbox for 'Hidden Numbers'.
- ORIGINATOR SETTINGS:** Includes Postpaid (checkbox), USD, Payment Terms, Rate Table, Routing Plan, Orig Groups, and Capacity (channels). Below this is the **LOW BALANCE CONTROL** section, which contains 'Notify Client' (USD) and 'Notify Admin' (USD) fields. The 'Threshold' (USD) and 'Capacity' (channels) fields are highlighted with red boxes. A red arrow points to the 'Capacity' field.
- COMPANY INFO:** Includes Name, Main E-mail, NOC E-mail, Billing E-mail, Rates E-mail, Address, Tax ID, Reg ID, Account Details, and Locale. There is also a checkbox for 'Notify about Factor Watcher blocks'.

At the bottom right, there are buttons for 'OK', 'Cancel', and 'Apply'.
