

Why does not Routing Analysis show routing according to rule's changes?

Symptoms

After modification in a routing plan or creating a new one, there are no changes in **Routing Analysis**.

Cause

The rules' or plans' changes do not affect Routing Analysis not resolving. However, if you change any data related to the termination side (upload new termination prices, add a new termination Account, etc.), and it happens to be after the Dynamic Routing Table has been already updated, the cause would be that the **Dynamic Routing Manager** has not yet been run to reflect those changes.

Resolution

You should run **Dynamic Routing Manager** (**System > Task Scheduler** section) every time changes are made to a routing plan. Only after that the **Routing Analysis** will show the correct data.
