## Invoices List

Since an invoice is an ultimate tool for controlling the volumes of provided services and their prices, the **Invoices** section of JeraSoft VCS is a staple instrument for managing your business. It allows you to create and administer all outgoing and incoming invoices. By clicking on the **Download**  icon, you can export and view respective invoice. By using the **Export List** option, you can download a currently stored list of invoices in a **.csv** format.

The section is presented in a form of a table of all invoices with the following columns:

*Screenshot: Invoices section main window*

Invoice No	Client / Reseller	ID Client / Reseller	Amount	Period	Due Date	Invoice Date
invoice-Rose orig-100007	Rose orig	11	7.55 USD	01/01/2018 – 12/31/2018 UTC	03/24/2018	03/17/2018 00:00:00 +0000
invoice-Rose orig-100006	Rose orig	11	7.55 USD	01/01/2018 – 12/31/2018 UTC	03/23/2018	03/16/2018 00:00:00 +0000
invoice-Rose orig-100004	Rose orig	11	7.55 USD	01/01/2018 – 12/31/2018 UTC	03/23/2018	03/16/2018 00:00:00 +0000
invoice-Rose orig-100002	Rose orig	11	7.55 USD	01/01/2018 – 12/31/2018 UTC	02/28/2018	02/21/2018 00:00:00 +0000
invoice-Rose term-100003	Rose term	12	942.00 EUR	01/01/2018 – 12/31/2018 UTC	25 days ago 02/19/2018	02/18/2018 00:00:00 +0000

Column Name	Description
<b>Invoice No</b>	Number of invoice
<b>Client /Reseller</b>	Name of a respective Client or Reseller.  <div style="background-color: #e0ffe0; padding: 5px;"> <p> <b>Tip</b></p> <p>You can create an invoice for a root Reseller</p> </div>
<b>ID Client/Reseller</b>	Client or Reseller identification number
<b>Amount</b>	Total sum of invoice
<b>Period</b>	Invoice period
<b>Due Date</b>	Determined due date of invoice
<b>Invoice Date</b>	Date of the invoice creation  <div style="background-color: #e0ffe0; padding: 5px;"> <p> <b>Tip</b></p> <p>When you leave the <b>Invoice Date</b> field empty, it will be identical to the time of an invoice creation. In case you determine it, the system sets the midnight of a specified day</p> </div>

Functional buttons and icons, presented in the section are as follows:

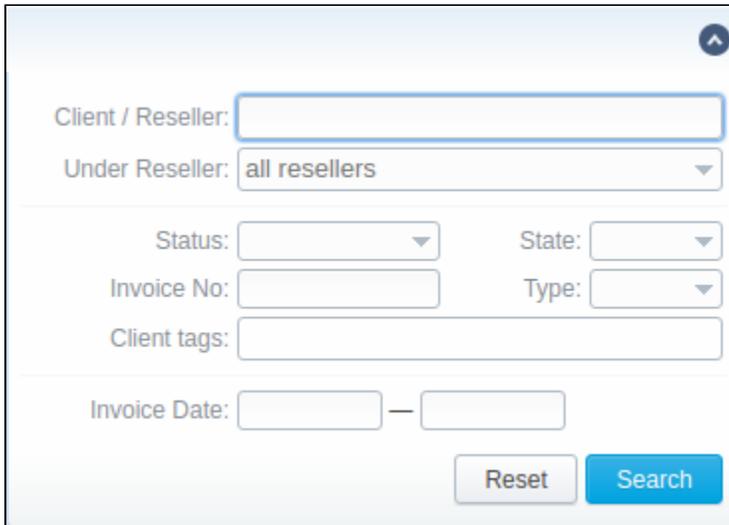

Buttons/Icon	Description
--------------	-------------

	Allows creating a new invoice in the system
	Allows exporting a list of invoices in a .csv file
	Allows management of state for the selected invoices on the list
	Indicates <b>normal</b> state meaning that respective invoice was paid in full. If the invoice is not fully paid, this icon will be grey
	Defines <b>to verify</b> state meaning that this invoice is waiting to be checked before it is sent to a client
	Defines <b>to send</b> state meaning that invoice is in sending queue
	Indicates outgoing invoice
	Indicates incoming invoice
	Allows downloading respective invoice file in .csv format
	Allows downloading an xDR file, if one is attached to the invoice. If there is no attached xDR file, this icon will be grey
	Allows deleting a respective invoice from the list

## Advanced Search

To filter data in the section, use the Advanced Search drop-down menu, which can be accessed by pressing a blue downwards arrow  icon in the top right corner of the screen.

Screenshot: Advanced Search drop-down menu

The screenshot shows a search form with the following fields and controls:

- Client / Reseller:** A text input field.
- Under Reseller:** A dropdown menu currently showing "all resellers".
- Status:** A dropdown menu.
- State:** A dropdown menu.
- Invoice No:** A text input field.
- Type:** A dropdown menu.
- Client tags:** A text input field.
- Invoice Date:** Two date input fields separated by a hyphen.
- Reset:** A button to clear the search criteria.
- Search:** A blue button to execute the search.

## Creating New Invoice

Invoices are created through the **New Invoice** button. When you click on it, a pop-up window shows up:

Screenshot: Create Invoice window

Invoices

Client / Reseller:

Period: Last Week 2018-03-05 — 2018-03-11 UTC

Type: outgoing

Currency: USD

Invoice No: (empty = auto)

State: normal

Invoice Date: 2018-03-16

Due: 5 days

Included Charges: Uncovered x

Comments:

Action: Generate new invoice

Template: default | PDF

OK
Apply
Cancel

Field	Description
<b>Client /Reseller</b>	Name of the <i>client</i> or <i>reseller</i>
<b>Period</b>	Define period of statistics that will be included into an invoice
<b>Type</b>	Specify the type of invoice: <b>outgoing</b> or <b>incoming</b>
<b>Currency</b>	Select an invoice currency from a drop-down menu
<b>Invoice</b>	Number of Invoice. The number length can't exceed 200 symbols
<b>State</b>	Select the state for a new invoice: <ul style="list-style-type: none"> <li>• <b>normal</b> - use this state to indicate that an invoice is paid</li> <li>• <b>to send</b> - use this state to indicate that an invoice is paid, but not verified yet</li> <li>• <b>to verify</b> - use this state to indicate that an invoice is created but has not been sent to a client yet</li> </ul>
<b>Invoice Date</b>	Specify the actual invoicing date
<b>Due (days)</b>	Define a number of days when an invoice is expected to be paid
<b>Included Charges</b>	Select the type of charges for invoices: <ul style="list-style-type: none"> <li>• <b>uncovered</b> - all charges that are not included in any previous invoice;</li> <li>• <b>covered</b> - all charges already included in the previous invoice;</li> <li>• <b>pending</b> - all pending charges.</li> </ul> <p>Please note, these charges don't include calls. Therefore, <i>call</i> charges will be added to any invoice regardless the <b>Included Charges</b> settings.</p> <div style="background-color: #e0ffe0; padding: 10px; border: 1px solid #c0ffc0;"> <p><span style="color: green; font-weight: bold;">✔ Tip</span></p> <p>It's not possible to include a charge twice with standard settings. To <b>re-include already used charge</b> in the invoice, you need to <b>combine uncovered + covered parameters</b> in the <b>Included Charges</b> field.</p> </div>
<b>Comments</b>	Specify additional information if necessary
<b>Action</b>	Select one of two available actions:

<b>Generate new invoice</b>	A new invoice will be generated, based on predefined templates in the <b>Invoices Templates section</b> . To select a target template, select it from the drop-down menu in the <b>Template</b> field
<b>Attach existing invoice</b>	If this option is selected, the following additional fields are displayed: <ul style="list-style-type: none"> <li>• <b>Attach Invoice</b> - allows user to attach an additional invoice</li> <li>• <b>Attach xDR</b> - allows to attach an additional xDR file in .csv format</li> <li>• <b>Events Amount</b> - indicate a total amount, charged for services (<b>calls, SMS, data, etc.</b>) traffic</li> <li>• <b>Other Amount</b> - indicate a total amount, charged for any other events (<b>e.g., package fees</b>)</li> </ul>

**Tip**

All automatically created invoices will have **to verify** state. To send an invoice to a client, you will need to change the state to **to send manually!**

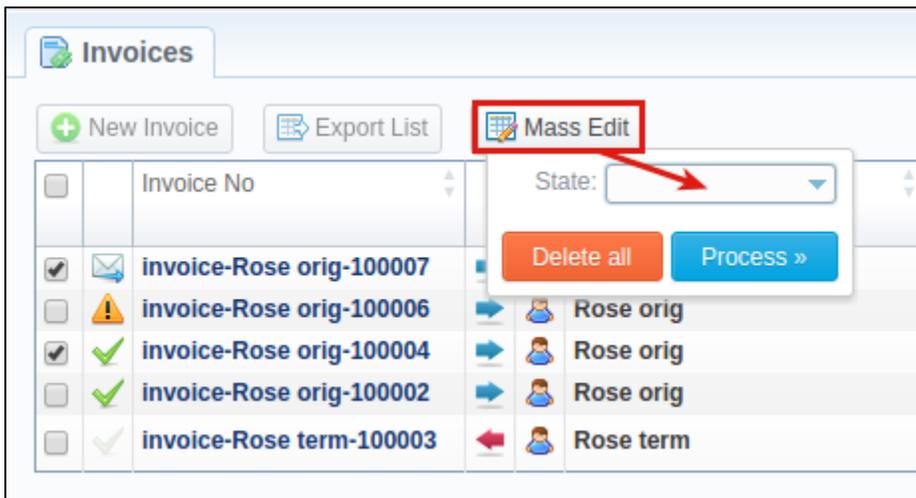

**Warning**

When generating invoices under **one reseller** for **different clients**, it is recommended to wait till the invoice for one client will be generated and only after that start generating the other one (avoid generating them simultaneously). That is important to avoid the situation of having **invoices with an identical number** in the system.

## Mass Editing

To change invoices **state** easily, use the **Mass Edit** button (screenshot below). First of all, you need to select invoices, for which state should be changed, then specify a state from a drop-down list, and press **Process** for applying the change. Also, using the following window, you may delete all marked invoices by pressing the **Delete all** button.

Screenshot: Mass Edit button

**Attention**

Please note:

1. While generating invoices, the system sorts packages in invoices by numbers. The names of packages could include numerical symbols. Please use numerical symbols like **001 name, 002 name, etc.** in names of packages, and avoid names with special symbols like **%001 name, -001 name**.
2. Currency rate of extra charges will be taken on the **date of charge, not on the date of invoicing**.

You can **include specific charges by ID** in the invoices (only for API). You can check the ID for extra charges and packages in the **Transactions section**. Then you need to add the variable **charges\_list** with respective values in the **Parameters** field of the **API Testbed** section (see screenshot below):

## Differences in totals

You may have noticed, while creating different reports, like the [Summary report](#), [xDRs list](#), etc., and then generating an invoice, you can get different totals. Here is a little background on what makes those differences.

Due to the **Included Calls** (*Attach xDRs list to the invoice* settings in the **Invoice Templates**, you can create an invoice based on different types of calls :

- **All payable** - includes calls with any duration that have non-zero costs and use packages
- **Non-zero payable** - includes calls with non-zero duration that have any cost and use packages

Therefore, invoice totals depend on the selected parameters and settings. For example, whether to include calls with any cost/duration/package or not. However, when you generate a report, the statistics is usually based on all calls. As the result, a difference between invoice and report totals appears; even when an invoice has completely another totals vs report data.

### Attention

The invoice and report totals could differ if you made a re-rating for a previous invoice period or the statistics were updated.

You may also need to know how **totals are rounded and calculated** in invoices. To get more information, follow this [link](#) or read about the general principals of rounding in VCS in [this article](#).

Besides, take a note of **currency settings**: there you may specify number of symbols that will be displayed in all reports with cost and rate values in the statistics. Also, it will be shown in the invoices, except total values (totals **always have 2 decimal places** in invoices).

- **Rates precision** - the number of decimal places for rates formatting.
- **Details precision** - the number of decimal places for detailed monetary values formatting. This precision is used for all reports except xDR report.
- **Totals precision** - the number of decimal places for total monetary values formatting.

### Error rendering macro 'contentbylabel'

parameters should not be empty
