## **System Settings**

The System settings information block contains default system parameters specified below:

Screenshot: System Settings window

Field	Description
Default Currency	Specify <b>currency</b> that will be used as default for generation of routing and new entities creation (accounts, invoices, transactions, clients, resellers, etc.). However, this currency <b>won't</b> be used for reports.
Domain Name	Enter <b>relevant domain</b> address of your VCS server. In most cases, <b>VCS IP</b> address should be entered here. Please note, if this name is specified <b>incorrectly</b> , you may experience issues with reseller logos display
Public IP	Specify an Internet Protocol address that LNP DIP requests
Default Language	Select your default language for the system. You can change it to your preferred language at any time.
Timezone	Select your default timezone
Statistics Processing Order	Specify what <b>statistics</b> to process first (newer or older)
Calculator Workers	Specify <b>number of threads</b> processing calculator tasks (number of CPU cores/2)
Calculator Mode	Defines the calculator workout, whether is will start periodically through Task Scheduler, or will be constantly running
Collect Anonymized Data c heckbox	Allows collecting anonymized system usage statistics
Default PIN Length	Sets the default length of a PIN-code when creating calling card series

## Attention

If you change the Default Currency, you need to restart the Dynamic Routing Manager in the Task Scheduler section for an immediate Routing Analysis functioning.
