

Backup Settings

Backup settings are presented with the following fields:

Screenshot: Backup Settings window

BACKUP SETTINGS

| | | |
|-----------------------------------|--|---|
| System backup period: | <input type="text" value="0"/> hour(s) (0 - do not backup) | How often to backup system, please note that actual backup will be done at the time when Backup Manager process runs. |
| Number of Backup Manager workers: | <input type="text" value="1"/> | Number of threads that run database backup. |
| Destination for backup packages: | <input type="text"/> | Absolute path where to put backup packages, it can not be inside root of VCS system. |
| Leave last X packages: | <input type="text" value="3"/> | How many last backup packages to leave. |

Update

| Field | Description |
|----------------------------------|---|
| System backup period | The field value specifies when the system should backup itself (for example, if you enter 24 as a value, it will mean that the system will backup itself every 24 hours) |
| Number of Backup Manager workers | Specify a number of system managers that run database backup |
| Destination for backup packages | Absolute path to the folder where the system backup copies will be stored <div><div><div>Warning</div><div>This folder shouldn't be within any system folder!</div></div></div> |
| Leave last X packages | Parameter that specifies how many backup copies will be stored at one given time (for example, if you enter 3 as a value, only three copies will be stored. When the fourth copy is added, the oldest one will be deleted) |
