Section overview

This section allows you to configure and integrate all switches into billing via RADIUS, SIP or xDR-files upload.

The section is presented in a form of a table of all created gateways in the system with the following columns (see screenshot):

Column	Description
ID	ID number of a gateway
Name	Name of a gateway
RADIUS Server	Description of current status and collector type of RADIUS Server (if such is applied)
Files Collector	Description of current status and collector type of applied Files Collector (if such is applied)
LNP Files Collector	Description of current status and collector type of applied LNP Files Collector (if such is applied)
Files Downloader	Description of current status and collector type of applied Files Downloader (if such is applied)
SIP Server	Description of current status and collector type of applied SIP Server (if such is applied)

The following **functional buttons/icons** are present in the section:

Button/Icon	Description
	Allows to create a new gateway
	Allows to set up traffic processing rules
	Displays a current status - enabled or disabled - of RADIUS/SIP Server, Files Collector, etc.
	Allows to delete a gateway from the system. Requires confirmation

Adding a New Gateway

To add a gateway to the list, click the **New Gateway** button and specify parameters in a pop-up window with settings. You can access the advanced settings by clicking on a downwards arrow  icon next to the name of a respective information block.

Information Block	Fields and Descriptions
General Information	General gateway and events processing information
	Name Gateway name
	IP Address Gateway IP address
	Allowed for Specify here, which resellers can use current gateway
	Service Select a service (calls, SMSs, data, etc.) for a current gateway
	Tag Indicate a particular tag to filter events by gateways while creating invoices and using reports.
	Code Deck The selected code deck will be used to pick codes and destination names for the Mobile Number Portability feature. By browsing information from the selected code deck, VCS will be able to perform appropriate number translations, which are processed by a current gateway.
	<p>Click the downwards arrow ⓘ icon next to the General Information information block to access the following advanced settings:</p> <ul style="list-style-type: none"> • Ident Priority - a hierarchy of account identification. By default, the field value priority is IP, name, ANI. • ORIG ANI Ident - select ANI identification of originating events (available options : Src number ext, Src number bill, Dst ext, Dst number bill) • TERM ANI Ident - select ANI identification of terminating events (available options: Src number ext, Src number bill, Dst ext, Dst number bill) • Rate ORIG events by Dst In code checkbox - activation/deactivation of originating events billed by DST PARTY ID IN • Rate TERM events by Dst Out code checkbox - activation/deactivation of terminating events billed by DST PARTY ID OUT • Rate event only with "success" status checkbox - activation/deactivation of processing of events that have "success" end code. If it's activated, events with error disconnect code won't be billed
Files Collector	Information block regarding the File Collector settings. Files Collector gathers event data from xDR-files (activate this option if you plan to use integration via xDR-files)
	<div> <div>Collector type</div> <div>Select a collector type you plan to use from the list</div> </div>

	<ul style="list-style-type: none">• D a t a S o u r c e	Specify a data source, where xDR files are stored
	<ul style="list-style-type: none">• F r o m P a t h	<p>Specify xDR-files path (mask paths are allowed). Available only for SSH and FTP</p> <div><p>⚠ Attention</p><p>If there are /var/cdrs folder with the latest CDR files and /var/archive_cdrs/ folder with outdated ones, and a user needs to download CDR files from both of them, he can use ; (semicolon) to separate paths or /**/ for recursive download. New paths may have the following look: /var/cdrs/**/bill*; /var/archive_cdrs/bill*.</p></div>
	<ul style="list-style-type: none">• S e n d e r M a t c h	Indicate the sender name or email. Solely for IMAP
	<ul style="list-style-type: none">• S u b j e c t M a t c h	Use a regular expression to search by message titles. Solely for IMAP
	<p>Click the downwards arrow  icon next to the Files Collector information block to access advanced settings:</p> <ul style="list-style-type: none">• Overwrite TZ - timezone selection (if you select a different timezone, the system will ignore a timezone stored in an xDRs-file and use current value)• Skip Zero Events checkbox - activation/deactivation of zero duration events ignoring• Skip Released Events checkbox - activation/deactivation of released events ignoring	
RADIUS Server	Information block regarding RADIUS Server settings. RADIUS Collectors gather packets from RADIUS-server via RADIUS-protocol (activate this option if you plan to use integration via RADIUS-protocol)	
	<ul style="list-style-type: none">• C o l l e c t o r T y p e	Select a collector type you plan to use from the list

	<div> <div> <div>•</div> <div>S</div> <div>e</div> <div>c</div> <div>r</div> <div>e</div> <div>t</div> </div> <div>RADIUS-server password</div> </div>
	<div> <div>Click the downwards arrow  icon next to the RADIUS Server information block to access advanced settings:</div> <div> <div>•</div> <div> <div>Overwrite TZ</div> <div>- timezone selection (if you select a different timezone, the system will ignore a timezone information stored in an xDR file and use current value)</div> </div> <div>•</div> <div> <div>Track Active Events</div> <div>checkboxbox - activation/deactivation of monitoring active events and event packets. This option is required for "Active Sessions" section to work and for RADIUS capacity control. Please note, it could slow down RADIUS for about 10-30%</div> </div> <div>•</div> <div> <div>Skip Zero Events</div> <div>checkboxbox - activation/deactivation of zero duration events ignoring</div> </div> <div>•</div> <div> <div>Skip Released Events</div> <div>checkboxbox - activation/deactivation of released events ignoring</div> </div> <div>•</div> <div> <div>Collect Accounting Data</div> <div>checkboxbox - if disabled, information from STOP packets will not be collected by database and <i>Radius Accounting</i> will be used only for <i>Active Sessions monitoring</i>. If enabled, information from STOP packets will be collected by database. By default, this checkbox is marked.</div> </div> </div> </div>
SIP Server	<div> <div>Allows acceptance of SIP packets from current gateway. Required for SIP Redirect routing feature</div> <div> <div> <div>•</div> <div>C</div> <div>o</div> <div>l</div> <div>l</div> <div>e</div> <div>c</div> <div>t</div> <div>o</div> <div>r</div> <div>T</div> <div>y</div> <div>pe</div> </div> <div>Select a collector type you plan to use from the list</div> </div> </div>
LNP Files Collector	<div> <div>This collector processes downloaded LNP/MNP files and stores them in the database. It's accessible only when you select the LNP /MNP type of gateway.</div> <div> <div> <div>•</div> <div>C</div> <div>o</div> <div>l</div> <div>l</div> <div>e</div> <div>c</div> <div>t</div> <div>o</div> <div>r</div> <div>T</div> <div>y</div> <div>pe</div> </div> <div>Select a collector type you plan to use from the list</div> </div> </div>

Files Downloading History

To view files downloading history, where gateway name, filename, download date and file size will be specified, open the **Downloads History** tab. Also, you can remove files from the list by selecting them and clicking the **Delete** button above the table.

Gateways		Downloads History			
Delete		Rows 1 – 11 of 11		20	Page 1 of 1
ID	Name	Filename	Download Date	File size	
11	Gateway	tmpysYWfv	01/25/2018 08:49:09 +0000	360.98 Kb
