

# Mail Server Settings

This information block allows you to specify mail server settings:

Screenshot: Mail Server Settings window

MAIL SERVER SETTINGS

Host:localhost

Hostname or IP address of SMTP server

Port:25Plain

Port/Security of SMTP server

From:example@localhost

Specify email address to send mail from, it is a system address for the SMTP server, not the one that appears in the "From" field in emails

Login:

Login of SMTP server (if login and password fields are empty, no authentication will be performed)

Password:

Password of SMTP server

| Field    | Description  |
