

Backup Settings

Backup settings are presented with the following fields:

Screenshot: Backup Settings window

BACKUP SETTINGS

System Backup Period:	<input type="text" value="0"/> hour(s) (0 - do not backup)	How often to backup the system. Please note that actual backup will be done at the time when the Backup Manager process runs.
Number of Backup Manager workers:	<input type="text" value="1"/>	Number of threads that run database backup.
Destination for Backup Packages:	<input type="text" value="/var/backup_dir"/>	Absolute path where to put backup packages. It cannot be inside the root of the VCS system.
Leave last X Packages:	<input type="text" value="3"/>	How many last backup packages to leave.

Field	Description
System Backup Period	The field value specifies when the system should backup itself (for example, if you enter 24 as a value, it will mean that the system will backup itself every 24 hours)
Number of Backup Manager workers	Specify a number of system managers that run database backup
Destination for Backup Packages	<div>Absolute path to the folder where the system backup copies will be stored</div> <div><div><div>!</div><div>Warning</div></div><div>This folder shouldn't be within any system folder!</div></div>
Leave last X Packages	Parameter that specifies how many backup copies will be stored at one given time (for example, if you enter 3 as a value, only three copies will be stored. When the fourth copy is added, the oldest one will be deleted)
