Section overview

This section allows a user to perform and trace all the financial operations regarding the client's/reseller's balances. The section offers an overview of every single transaction performed in the system regardless of whether it's a payment or a charge and provides a wide variety of functionalities for transactions management. Since the transactions section is a key tool for managing client's/reseller's balances, it's inseparable from the following sections of the system: [Clients](#), [Invoices](#), [Resellers](#), etc.

Transaction charges will be created according to the **configurations of Tax Profiles, Rate Tables** (including tax or not) and the **next parameters**:

- invoice time (transaction date);
- client ID;
- currency ID;
- positive or negative amount.

Tips

- In case you change one of the parameters listed above and the rerating is done, you might have additional transactions (with zero or non-zero taxes).
- When a customer has calls with and without taxes for the same hour, two charges will be listed in the transactions section: one charge with taxes and the second one without taxes.
- If you see a transaction with a tax represented as a dash (), it means that all taxes were included in rate tables.

The section is presented in the form of a table of all conducted transactions with the following columns:

Screenshot: Transactions section main window

Transactions										
New Transaction		Import Transactions		Export to CSV		Rows 1 – 5 of 5				
ID	Payment Account	Client / Reseller	Client ID	Amount	Taxes	Description	Transaction Date	Author

Column Name	Description
ID	Payment through an ID number
Payment Account	Shows a respective payment account related to a performed payment or a respective charge type, such as <i>calls</i> , <i>products</i> , <i>extra charges</i> (each type has a visual representation in a form of a respective icon)
Client /Reseller	Displays the name of a client or reseller that was engaged in payment operation
Client ID	Customer's identity
Amount	The respective payment operation sum
Taxes	Amount of taxes

Description	Comments about a respective payment
Transaction Date	Displays a respective payment date related to a performed payment
Author	Name of the user who performed the latest transaction (regardless whether it's a payment or a charge)

The list of **functional buttons/icons** is as follows:

Button/Icon	Description
	Allows to create a new transaction
	Allows to import user's transactions into the system
	Allows to download a list of transactions in a .csv file
	Indicates the type of transaction - payment
	Indicates the type of transaction - extra charges
	Indicates the type of transaction - services charges
	Indicates the type of transaction - packages fees
	Indicates that a transaction is approved
	Allows deleting a transaction from the system. Requires confirmation

Advanced Search

In the top right corner of the section above the table, an **Advanced Search** drop-down menu is located. By clicking on a blue downward arrow  icon, a drop-down menu with the following structure is displayed:

Screenshot: Advanced Search drop-down menu

Attention

Author column is going to be filled only if a transaction has been added **manually** by a user through the **Transactions** section in **JeraSoft Billing** or the **Refill Balance** page on **JeraSoft Client Portal**. In case a transaction is automatically generated by the system, the **Author** column will be empty.

Search

Field	Description
Client	Indicate a client you wish the section to be filtered by

Payment Account	Select from the list of all payment accounts in the system
Type	Select a type of transaction: <ul style="list-style-type: none"> • Payment • Charge
Status	Select from the list of transaction statuses: <ul style="list-style-type: none"> • Pending • Approved
State	Indicate whether you wish payments covered by the invoices to be displayed by selecting from the list: <ul style="list-style-type: none"> • Covered • Uncovered
Date	Specify the date in the date picker

After filling in the fields, click **Search** to filter section data or **Reset** to clear search results.

Adding New Payment/Charge

To add a payment, click the **New Transaction** button. In the appeared pop-up window, specify the following parameters and click the **Apply** button.

Screenshot: New transaction settings

Transactions

Client:

Type: Payment

Payment Account: General

Amount: USD

Transaction Date: Approved

Description:

Field name	Description
Client	Indicate a target client
Type	Specify a type of transaction. For incoming transactions, select Payment operation type, for outgoing – select Charge .

Payment Account	<p>Choose a respective account from the drop-down list of all available payment accounts. For charge type, you can select:</p> <ul style="list-style-type: none"> • extra charges outgoing; • extra charges incoming. <div>  Attention </div> <p>Please note that you will have the same type of payment account in invoices. So, you can choose where the following charge will be shown in an outgoing/incoming invoice.</p> <p>For example, if you want to give a refund to the client, please select extra charges outgoing. It will guarantee that this charge will be visible in the invoice.</p>
Amount	<p>Insert an amount of the transaction, which can be positive or negative:</p> <ul style="list-style-type: none"> • positive amount is credited to a client; • negative amount is debited from a client. <div>  Tip </div> <p>Transaction amounts could be specified with a comma as a decimal delimiter: for example, 2,45.</p> <p>If your transaction type is Charge, you can choose whether a specified amount includes a tax or not by choosing a respective value in the drop-down list:</p> <ul style="list-style-type: none"> • no taxes; • including taxes; • excluding taxes. <p>The tax rate is based on the tax profile of the client's reseller.</p>
Transaction Date	Indicate the actual date of the transaction in a date picker
Description	Notes for a new transaction
Status	<p>Define the state of the transaction:</p> <ul style="list-style-type: none"> • pending • approved <div>  Tip </div> <p>If you change the transaction status in the respective field from Approved to Pending when adding a payment, this payment will have to pass additional approval check by a billing operator</p>

Attention

When a customer has 2 calls (with and without taxes) for the same hour, **two charges** will be listed in the transactions: *one charge with taxes* and a second one - **without taxes**. In case you change one of the parameters listed above and the re-rating is done, you might have additional transactions.

If you see a transaction with a **tax represented as a dash ()**, it means that all taxes were included in rate tables.

When the **Reseller owns a payment account**, transactions for this account can be created for Clients and Sub-Resellers belonging to this Reseller. However, transactions of this Reseller (owner of the account) cannot be assigned to this payment account.

Exporting and Importing Transactions

By clicking the **Export to CSV** button, you will be able to export all currently stored payments in a **.csv** file.

You can easily perform an import of payments by clicking the **Import Transactions** button and following on-screen instructions:

Step 1: Selecting a File and Specifying Additional Parameters

Upload a file from your computer, indicate such default parameters as **Transaction Date**, **Currency**, **Payment Account**, **Date and Time Format**, and click **Process**.

Screenshot: Transactions importing process. Step 1

Transactions

SELECT FILE (STEP 1 OF 3)

Select file to import: Choose File No file chosen

DEFAULT VALUES

Transaction Date: 2018-02-21 00:00:00+0000

Currency: USD

Payment Account: General

Date Format: Auto

Time Format: Auto

Close Process

Step 2: Recognizing The File

The system will recognize the file and you need to select 3 mandatory columns: **Client Info**, **Amount**, and **Transaction Date**. Following this, click **Process** >> again.
