- [Creating a New Data Source](#)

## Section overview

Data Source section is a first step to providing easier and more convenient work with data sources: files import, in particular. Previously, data source settings were split between [Rate Tables](#), [Resellers](#), [Gateways](#), and [Number Portability](#) and caused certain inconvenience in its configuration. Now, all these settings have been united in a single section making it possible to configure a data source in one place and use it throughout the entire system. The section is presented in the form of a table with the following columns:

Screenshot: Data Source section

Data Sources					
<div>+ Add Source</div>					
Rows 1 – 1 of 1			20	Page 1 of 1	
ID	Name	Connection type	Host	Port	
1	New DS	FTP	12.5.5.6	21	
<div>AboutGet Support0.1948s</div>					

Column Name	Description
ID	Data source identification number
Name	Data source name
Connection type	Type of connection to the data source
Host	IP address or domain name
Port	Data source port

Functional buttons and icons presented in the section are as follows:

Button/Icon	Description
	Allows creating a new data source
	Allows deleting a data source from the system

## Creating a New Data Source

To create a new data source, you need to follow these steps:

1. Click the **Add Source** button
2. In the pop-up window, fill in the required fields (see screenshot below) and click **OK**
