Execution Logs

Execution Logs tab provides information about handlers execution such as date and time of execution, status, duration, etc. The tab is presented in the form of a table with the following columns:
Screenshot: Execution Logs tab

Column Name	Description
ID	Handler's identification number
Date	Time and date of handler execution
Event	Details on handler type and event
Status	Status of a handler: ***Success/Fail***
Name	Title of the handler
Error	Description of the event in case of an error
Duration	Amount of time, spent on handler execution

When you click on **Details** icon, a new window with a description of respective handler execution appears (see screenshot below). This window contains information that JeraSoft Billing sends via the handler.

Click on this icon to expand logs. For example, logs for handlers with *before* type will only show modified data.
