Attention

Please note that if a customer had no assigned **packages, accounts, presets** or **translations**, and you decided to add one, then RADIUS or SIP Redirect servers will notice those changes only after *Cache Manager* runs and does its job. Please note that this is only applicable if a customer previously had absolutely no items listed above, in other words, if you add a second account to a customer, then that change will be effective instantly.

Utility management

You can always configure the run time of any utility by clicking a respective **edit**  icon. A pop-up window for utility management has the following structure (see screenshot below):
