

# Backup Settings

Backup settings are presented with the following fields:

Screenshot: Backup Settings window

BACKUP SETTINGS

|                                   |  |   |
|-----------------------------------|--|---|
| System Backup Period:             | <input type="text" value="167"/> hour(s) (0 - do not backup) | How often to backup the system. Please note that actual backup will be done at the time when the Backup Manager process runs. |
| Destination for Backup Packages:  | <input type="text" value="/opt/jerasoft/backups"/>           | Absolute path where to put backup packages. It cannot be inside the root of the system.                                       |
| Include into backup:              | <input type="text" value="Database"/> x                      | Which components of system should be included into backup.  |
| Leave last X Packages:            | <input type="text" value="3"/>                               | How many last backup packages to leave.   |
| Number of Backup Manager workers: | <input type="text" value="1"/>                               | Number of threads that run database backup.   |

| Field                            | Description  |
|----------------------------------|--|
| System Backup Period             | The field value specifies when the system <b>should backup itself</b> (for example, if you enter <b>24</b> as a value, it will mean that the system will backup itself <b>every 24 hours</b> ).  |
| Destination for Backup Packages  | <div>Absolute <b>path</b> to the folder where the system backup copies <b>will be stored</b>.</div> <div><div><div>Warning</div><div>This folder <b>shouldn't be</b> within any system folder!</div></div></div>   |
| Include into backup              | Specify components of the system which should be included into backup.   |
| Leave last X Packages            | This Parameter specifies <b>how many</b> backup copies will be stored <b>at one given time</b> (for example, if you enter <b>3</b> as a value, only <b>three</b> copies will be stored. When the <b>fourth</b> copy is added, the oldest one <b>will be deleted</b> ). |
| Number of Backup Manager workers | Specify the number of system managers that run <b>a database backup</b> .  |

Attention

The backup will not be created if the disk size is not enough.
