Report Queries List

This section allows you to view, execute and manage the Report Queries of **Active Sessions**, **Balance Report**, **Customer Dynamics**, **Invoicing Report**, **LCR Lists**, **Orig-Term Report**, **Profit Report**, **Rates Analysis**, **Routing Analysis**, **Summary Report**, and **xDRs List**. Moreover, you can send reports to email to keep yourself informed about the traffic status without the need to log in to the system and query reports. The section structure is as follows:

Screenshot: Report Queries section main window

| Column | Description |
|-----------------|---|
| ID | Query ID |
| Name | Name of the query |
| Query | Query details |
| To Email | Tool to run a report automatically at the exact time and send the results to the list of emails |

The section contains the following functional icons:

| Icon | Description |
|------|---|
| | Allows creating a new report query |
| | Allows previewing a query |
| | Allows running a respective report by this query |
| | Indicates that sending a report via email option is enabled. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 5px;"> You can enable/disable the to email rule after it's been created in the system by clicking the indication icon.</div> |
| | Indicates that sending a report via email option is disabled. |

To start managing, choose the respective query from the section and click on the name to open the settings.

Creating a Report Query

You can create a report query either using a **New Report Query** button in the main section, or from the respective sections while generating reports. If you are adding a new query from the report section, you need to:

1. open the target report section;
2. fill in a query form with respective parameters;
3. click the **Save Query** button;
4. in a pop-up window with template settings, fill in all required fields (screenshot and field description is provided down below);
5. click **Apply** to save a template.

Screenshot: New Query form

| Information Block | Description |
|-------------------------|--|
| Name | Specify a name of the template |
| Visibility | It allows controlling the visibility of respective reports templates whether you want to keep templates private or leave them visible for other users: <ul style="list-style-type: none"> • Public - available for all users of the same Reseller; • Private - accessible strictly for the creator. |
| Report | Here, a report type will be prefilled. |
| Filters / Output | Here you need to specify filters that will be used for generating a correct report and choose the output type to view the report |

To Email Tab

After creating the Query, you can manage whether to allow generating reports at the specific times and send results to specified emails. For this, open the needed **Report Query**, and click the **To Email** tab:

Screenshot: To Email tab

| Information Block | Description | |
|-------------------|--------------------|---|
| General | Status | Specify if this function is on: <ul style="list-style-type: none"> • Enabled • Disabled |
| | Output Type | Specify a file type to be sent: <ul style="list-style-type: none"> • CSV • Excel |

| | | |
|-------------------|---------------------------|---|
| Recipients | Users | Define system Users to send a Query to (can be empty if the <i>Extra Emails</i> field is filled in) |
| | Extra Emails | Specify the needed extra email addresses (can be empty if the <i>Users</i> field is filled in) |
| Scheduling | Run Times | Determine an appropriate time to generate a report automatically, it could be several times, for example, 10:00, 12:00, 18:00 |
| | Run Times Timezone | Indicate a timezone for a selected report run time |
| | Days of the Week | Define days of the week to generate a report automatically. For example, you can run a report only on Monday or each day of the week. |

 **Warning**

If you create the report query and the **To Email** option is enabled, the client will receive the file with a report even when there are no statistics for a specified period.
