- Creating a New Taxes Profile
  - Type: Customer
  - Type: SureTax
  - Type: Compliance Solutions
  - Type: Avalara
- Tax Values Management

#### Section overview

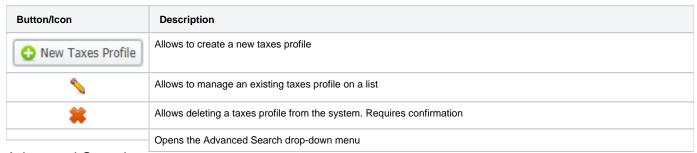

Taxes profiles, equally as Time profiles, is a JeraSoft Billing tool that makes the process of clients' rate tables management exceptionally agile. Taxes profile is a **set of tax rules** that can be applied to client's rate tables in different taxation schemes. This section allows you to add, edit, and delete profiles and is presented in the form of a table with the following columns (see screenshot):

Screenshot: Taxes Profiles section

Column Name	Description
ID	Taxes profile's identification number
Name	Name of a taxes profile (clickable, to access taxation values for <i>Customer</i> type profile)
Profile Owner	List of resellers corresponding taxes profile was assigned to
Notes	Additional information regarding a taxes profile
Sort Order	Order of the entity in the list

Functional buttons/icons, presented in the section, are as follows:

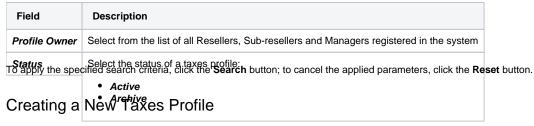

#### **Advanced Search**

In the top right corner of the section above the table, an **Advanced Search** drop-down menu is located. By clicking on a blue downward arrow icon, a drop-down menu with the following structure is displayed:

Screenshot: Advanced Search drop-down menu

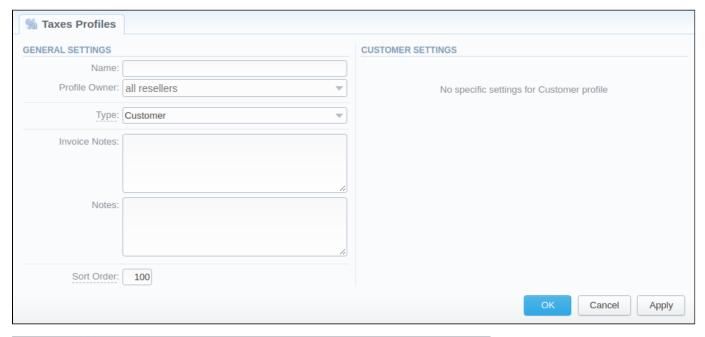

To create a new profile, you need to:

- Click the **New Taxes Profile** button
- Fill in mandatory fields (specified in tables below)
- Click the **OK** button

You can select the type of a taxes profile while creating a profile:

#### **Type: Customer**

Sea	ervice	Set a Service for the rule:  • Calls • SMS • Data
Tra Ty <sub>l</sub>		Specify the Transaction Type for the Service
Se	ervice Type	Specify the Service Type for the Service

Please note that you cannot change the taxes profile type after creation.

### Tax Values Management

To manage a tax value within the Customer type of the taxes profile, you need to click the respective profile name. In the pop-up window, you can add a new rule by clicking Add Tax Value or edit already existing values. The structure of a pop-up window is as follows:

Screenshot: Tax Values Management

Field	Description	
Name	Name of the tax value added to this profile	
Value	Specify a tax value in %	
Effective from	Start date of a corresponding tax value	
Tag	Specify tag(s) you would like to be applied to corresponding tax value. If no tags are added, you can leave the field blank	
Priority	Specify the priority of tax value usage	

While operating with tax values, you can apply Advance Search to find the value you might be interested in. To do so, click on a red downward arrow Vi con in the top right corner of the pop-up window and set the Status and Status Date fields:

#### Status:

current on - if chosen, all tax values with the latest Effective from field value will be displayed

old for - if chosen, all tax values, whose Effective from field value is older in comparison to its current one, will be displayed

future for - if chosen, all tax values, whose Effective from field value > Date, will be displayed

all - if chosen, all tax values will be displayed

Date - set the time and date that will be applied for the search.

By default, tax values displayed in a pop-up window are filtered by the *current on* status.

In cases when you determine a **Priority** status, you basically set the order of the taxation. So, the tax with **Priority 1** will add % tax to operation sum, the tax with **Priority 2** will add tax % to the **resulted sum** (operation sum + 1<sup>st</sup> tax %). Each following priority will add % tax to operation sum plus all the previous priorities values.

For example:

If operation sum is 100 USD, and there is a single tax with Priority 1 and a value of 10%, the taxation result will be 10 USD, so full operation plus tax is 110 USD.

If there are **two taxes** with priorities of 1 and 2, and values of 10% and 20%, respectively, then the **first tax yield** will be **10 USD**, and **second tax yield** will be **22 USD** (because 20% is calculated from sum of operation + previous tax), and total will be **100 + 10 + 22 = 132 USD**.

You cannot delete or archive a tax profile that is currently assigned to the Client, Call Shop, Reseller, or Calling Card
