	<ul style="list-style-type: none">%d	Day of the month in numeric form. Allowed values: from 01 to 31
	<ul style="list-style-type: none">%m	Month number. Allowed values: from 01 to 12
	<ul style="list-style-type: none">%Y	Number of the year that consists of 4 numbers. Value example: 1999, 2005, 2010
Date and Time Format	Specify the date and time parameters here	
	<ul style="list-style-type: none">%d	Day of the month in numeric form. Allowed values: from 01 to 31
	<ul style="list-style-type: none">%m	Month number. Allowed values: from 01 to 12
	<ul style="list-style-type: none">%Y	Number of the year that consists of 4 numbers. Value example: 1999, 2005, 2010
	<ul style="list-style-type: none">%H	Hours in 24-hour format with leading zeroes. Allowed values: from 00 to 23
	<ul style="list-style-type: none">%M	Minutes with leading zeroes. Allowed values: from 00 to 59

	<ul style="list-style-type: none"> • %S 	Seconds with leading zeroes. Allowed values: from 00 to 59
Date and Time w /TZ Format	Specify the date and time with timezone parameters here	
	<ul style="list-style-type: none"> • %d 	Day of the month in numeric form. Allowed values: from 01 to 31
	<ul style="list-style-type: none"> • %m 	Month number. Allowed values: from 01 to 12
	<ul style="list-style-type: none"> • %Y 	Number of the year that consists of 4 numbers. Value example: 1999, 2005, 2010
	<ul style="list-style-type: none"> • %H 	Hours in 24-hour format with leading zeroes. Allowed values: from 00 to 23
	<ul style="list-style-type: none"> • %M 	Minutes with leading zeroes. Allowed values: from 00 to 59
	<ul style="list-style-type: none"> • %S 	Seconds with leading zeroes. Allowed values: from 00 to 59
	<ul style="list-style-type: none"> • %Z 	Timezone settings

Attention

If you change the **Default Currency**, you need to restart the **Dynamic Routing Manager** in the **Task Scheduler** section for an immediate **Routing Analysis** functioning.
