Warning

Please note, the system shows rounded values in the reports. However, while calculating, the system takes an exact value. Hence, the procedure of the rounding is as follows:

- the system rounds currency values according to the settings of a respective currency;
- other parameters are rounded to the nearest ten thousandths. For example, 3.879256 to 3.8793.

Simple scheme: how to generate a balance report

To create a simple report you need to:

- select target parameters for the report in the **Filters** menu;
- enter the interval and specify a timezone;
- select the **Mode** and **Client Type**;
- specify parameters in the **Group by** field; for example, **Client ID**;
- choose columns in the **Output** form; for example, **Client, Payment Account, Document Icon, Document Info, Opening Balance, Debit, Credit, Closing Balance, Date**;
- specify the **Type** field or leave its default settings (Web/Grouped);
- click the **Query** button.

Tip

- If the data is grouped in the report, it will be shown initially collapsed. To expand or collapse data in your report, click the  plus or  minus icons.
- Please note, the **Order by** option is active when the **Type** of the Output form is **Plain**. When it is **Grouped**, the data is only sorted by values specified in the **Group by** field.

Creating a Query Template

To create a template for reports and save specified parameters, click on the **Save Query** button. A pop-up window with settings will appear, and you will need to fill in the following form:
