Section overview

The Packages section helps to add and manage any one-time or regular supplementary services that your company may provide in addition to VoIP. For example, you can create a package with rent of some equipment or create a free minutes promotional package. The section is designed in the form of a table that displays all currently available packages and has the following structure:

Screenshot: Packages section main window

<div>Packages</div>							
<div>+ New Package</div>		Rows 1 – 3 of 3 <div>20</div> <div>Page 1 of 1</div>					
ID	Status	Name	Activation Fee	Subscription Fee	Period	Reseller	
4	<div></div>	Package 1	0.00 USD	0.00 USD	1 month(s)	Reseller A	<div></div>
5	<div></div>	Package 2	0.00 USD	0.00 USD	1 month(s)	Reseller A	<div></div>
6	<div></div>	Package 3	0.00 USD	0.00 USD	1 month(s)	Reseller A	<div></div>

Column	Description		
ID	ID of a package		
Status	Status of a package		
	<div></div>	Active	Package is in use by a customer
	<div></div>	Disabled	Package is not used
	<div></div>	Archived	Package is not used and not available anymore
Name	Title of a package		
Activation Fee	Fee that will be charged upon package activation		
Subscription Fee	Fee that will be charged upon package renewal		
Period	Package renewal period		
Reseller	Name of a reseller, to which a target package belongs		

Attention

Please note that the **Package archiving** will perform closing of the current **Subscription** used for this package.

The list of functional **buttons/icons** in the section includes:

Button/Icon	Description
<div>+ New Package</div>	Allows to create a new package
<div></div>	Allows deleting a package from the list. Requires confirmation

Advanced Search

By default, the information in a section is filtered by **Active** statuses. To open an **Advanced Search** drop-down menu, click on a red downward arrow  i con and fill in the following fields with the required information:

Screenshot: Advanced Search drop-down menu

Reseller:

Status:

Dynamic Tag:

Allowed DID Tags:

Reset

Search

Field	Description
Reseller	Indicate a name of a target reseller
Status	Select the status of a package: <ul style="list-style-type: none">ActiveDisabledArchive
Dynamic Tag	Indicate a target dynamic tag of a package
Allowed DID Tags	Indicate target DID tags of a package

To apply the specified search criteria, click the **Search** button; to cancel the applied parameters, click **Reset**.

Adding a New Package

You can add a new package by clicking the **New Package** button. A pop-up window with settings contains the following information:

Information block	Field and Description	
General Settings	General information about a package	
	Name	Determine the name of your package
	Reseller	Specify an owner of this package
	Status	Select a current status for the package: <i>active/disabled/archive</i>
	Type	Specify the package type: <ul style="list-style-type: none"> Customer - this type will be applied to origination traffic regardless of the rate; Vendor - this type will be applied to termination traffic regardless of the rate. <div> <div>Attention</div> <div>This option has been added in version 3.16.0.</div> </div>
Period Settings	Settings regarding a package period	
	Period	Specify a period for the current package if it's renewable. Allowed values: 1-24 hours, 1-99999 days, 1-12 months, 1-99999 years.
	Advance Renew	Next renewal will be made within a specified period in advance (before the renewal date). Allowed values: 1-24 hours, 1-99999 days, 1-12 months, 1-99999 years.

	<div> <div> Renew For </div> <div> Indicate a period, during which the system will try to renew a package. If no value is specified, attempts to renew a package will be endless. Allowed values: 1-24 hours, 1-99999 days, 1-12 months, 1-99999 years. </div> </div>
	<div> <div>  Attention </div> <div> Please note that Period, Advance Renew and Renew For fields cannot be set to non-normalized time intervals (example: 75 hours). </div> </div>
Billing Settings	List of settings concerning the billing feature
	<div> <div> Currency </div> <div> Define a currency for this package </div> </div>
	<div> <div> Fees Include Taxes c checkbox </div> <div> If enabled, taxes are included in package prices, if disabled – taxes will be calculated regarding a customer's respective Tax Profile </div> </div>
	<div> <div> Align to Payment Terms checkbox </div> <div> Allows the system to align a package period to customer's Payment Terms, equalizing Package billing with actual invoicing. <div> <div>  Attention </div> <div> The length of the first Subscription period can be reduced in order to allow the following periods to match the invoicing periods in the Client's Payment Terms. All the charges and limits of the first period will be proportionally recalculated if the duration of the first period has been reduced. In order to process it correctly, the Package Period should match the Client's Payment Terms length. Alternatively, the periods of the Package and Payment Terms need to equal to a multiplex number. In this case, we will get equal Package charges in each invoice provided the periods are equal. If the Package period is longer than the Payment Terms length, we will get the Package charges with an equal interval. </div> </div> </div> </div>
	<div> <div> Full charge checkbox </div> <div> Allows forcing full charge and limits for the first period regardless of the enabled Align to Payment Terms option. </div> </div>
	<div> <div> Charge on Event c checkbox </div> <div> If enabled, a package subscription fee will be applied when the first call within this package is made. Otherwise, a package would be free. </div> </div>
	<div> <div> Setup Fee </div> <div> Select from a list of available options of setup fee settings: <ul style="list-style-type: none"> • Charge - setup fee will be charged when an event is billed by volume limit • Don't charge - setup fee won't be charged when limit by volume is used for event billing </div> </div>
	<div> <div> Client's Balance </div> <div> Choose one of the following options: <ul style="list-style-type: none"> • Allow activating if insufficient- client's package will be activated regardless of the client's balance; however, package limits will be used only when the clients balance is sufficient; • Deny activating if insufficient- client's package will be activated only if there are sufficient funds on the balance </div> </div>
	<div> <div> Renewal Charge </div> <div> Determine when the charge should be created: <ul style="list-style-type: none"> • Before period start • On period start <div> <div>  Tip </div> <div> This parameter will affect when the Package charge will be included in an Invoice. For example: <ul style="list-style-type: none"> ◦ the Before period start option is typically used for pre-paid as the system will create a charge just before the Package renewal. Thus, for a monthly Package, a charge for Feb will be created on Jan 31st and fall into Jan Invoice, etc. ◦ the On period start option is typically used for post-paid as the system will create a charge right on the renewal. So, for a monthly Package, a charge for Feb will be created on Feb 1st and fall into Feb invoice, etc. </div> </div> </div> </div>
Package Application	Information on package application

	Priority If there are multiple packages that satisfy a call, a package with the highest priority will be used (i.e. priority 2 < priority 1). <div>  Attention Please note that packages with minutes will always be used before packages with money regardless of the priority. </div>
	Dynamic Tag Add a tag for the events, billed by this package
	Start Date Indicate an effective start date of a package. This feature is used for temporary packages.
	End Date Determine an effective end date of a package. This feature is used for temporary packages.
Fees	Information block is used for package fees indication and presented in the form of a table. To add a new fee type, you need to click on a  icon next to its name.
	Fee Type Select the type of fee. There are two possible types: <ul style="list-style-type: none"> • Activation – a fee that will be charged upon package activation • Subscription – a fee that will be charged upon package renewal
	Fee Name Specify a name of a fee
	Fee Note Here you may enter additional information about a fee
	Rate Indicate the price for a fee. Price is indicated in the package currency
DID Limits	Specify how many DIDs and from which group can be assigned to a customer with this package
	DIDs Quantity How many DIDs can be assigned to the client's accounts
	Allowed Tags Specify tags that are used while creating DIDs
	On Hold Indicate for how many days a DID is kept on hold after the package is deactivated
Limits	Here you can create promotional minute packets that will be included in the package. To add a new limit, click on a  icon next to Limits .
	Code Deck Specify a Code Deck if you plan to create limits by using Code Names
	Service Define a service this limit will be used for
	Type Select a limitation type from the drop-down list: <ul style="list-style-type: none"> • Money • Volume You can set both types within the same package
	Code Specify a code. Please note that package limits are working only for the exact code. I.e., if a short code like 121 was added, package limits will work only for this code and won't automatically work for longer codes like 12157 . To make volume limits work for long codes, you must add * (for example, 121* code). If the Code Name field is specified, this one will be inactive.
	Code Name Specify a code name from a selected Code Deck. If the Code field is specified, this one will be inactive.
	Limit Enter the number of free minutes or bonus money (depends on a selected limitation type) that will be used for a specified code or code name
	<div>  Warning When you assign different packages (with specified volume limits and tags) to the same client, two or more packages could not be used simultaneously. </div>
Discounts	A promotional discount of the package subscription fee. To add a new discount, click on the  icon next to Discounts .

Activation Count	Specify the sequence number of the reactivation when the package will trigger the discount. For example: if the Activation Count is 2 , the discount will be applied for the second package reactivation and further.
Discount	Specify the amount of subscription fee cut. Discount is indicated in the package currency.

✓ Tip

1. If the **client doesn't have enough money for a package activation**, a respective pending charge will appear. This charge includes all amounts needed for package activation. Also, you can add this charge to the invoice.
2. You can **assign the package in the past** and add package minutes backdated.
For example, you assign the **Canada 200 minutes** package on April 12th, but you want the package to be used since April 1st. Then, apply package rerating to recalculate the tariffication during the period. Please, run rerating after the assignment of the package for a current month
3. **Volume Limits** will be recalculated according to payment terms if the period is specified and both **Align to Payment terms** is enabled.
4. Package reactivation will be stopped after the **Renew Due** period. However, a DID for this package will be expired after the **On Hold** period. Therefore, we recommend setting the same values for DID **On Hold** and Package **Renew Due** parameters.

Please keep in mind that:

1. When **two similar packages** (for example, with the same destinations) are **assigned to a client**, the system takes the package with the highest priority or earlier expiration date. Thus, only one package is used for one established call. The second package will be applied right after the first one is fully used.
2. If the **client doesn't have enough funds** for the package (with a DID number) reactivation and DID hold date has already expired, attempts for package reactivation will be stopped.

⚠ Attention

When you change the **name of the package** in **Retail > Packages**, it will be automatically changed in the **Management > Client Packages** section as well, even if this package is already assigned. As a result, in the **Invoices** and **Transactions** sections, an **old** name of the package will be specified. We **do not recommend** to edit the name of an already assigned package in **Retail > Packages**.
